PROFILE

Full Stack Developer with 5 years of experience architecting scalable E-commerce platforms, SaaS products, and AI-powered web applications using PHP (Laravel), Vue.js, and MySQL. Proficient in driving backend performance optimizations and managing cloud infrastructure with Docker and AWS, alongside hands-on expertise integrating AI solutions like Google Vertex AI to automate complex business workflows.

EDUCATION

Diploma in Computer Engineering: Aug 2015 – Aug 2018 Govt. Polytechnic, Hisar — Hisar, India

PROFESSIONAL EXPERIENCE

Full Stack Developer | Feb 2023 – Present at **Techquad Pvt. Ltd.** — Hisar, India (Remote).

- Developed and managed **large-scale SaaS applications** using **Laravel and MySQL**.
- Integrated AI-based features using **Google Vertex AI** for automated document processing and data extraction, heavily reducing manual processing time.
- Built and maintained REST APIs, handling deployment and cloud infrastructure using Docker and AWS.
- **Improved codebase performance** through **query optimization** and backend refactoring.
- Diagnosed and resolved high-priority production issues using Xdebug to trace execution and maintain application stability

Senior PHP Developer | Apr 2022 – Feb 2023 at **SnakeScript Solutions LLP.** — Mohali, India.

- Developed **multi-vendor E-commerce** platforms and custom **CRM** tools.
- Led frontend improvements using **Vue.js** and **AJAX** for faster, more responsive UI interactions.
- Optimized database queries, reducing response times and improving overall system reliability during peak traffic.
- Collaborated across cross-functional teams to consistently meet strict project deadlines.
- Troubleshoot and corrected major **bugs** across **CRM** and **e-commerce** systems to keep platforms running smoothly.

PHP Developer | Feb 2021 – Mar 2022 at **WebUtopian Technologies** — Mohali, India

- Built and maintained e-commerce websites and custom portfolio sites using Laravel, WordPress, and responsive design.
- Improved page loading speeds and enhanced overall user experience by implementing Redis for caching and optimizing assets.
- Integrated secure payment gateways and proactively addressed technical problems affecting site performance and reliability.

PROJECTS

Rapidocs – SaaS B2B Document Management

- Designed and developed a **cloud-based** document management system for **B2B** clients.
- Implemented **Google Vertex AI** for automated document conversion and **data extraction**.
- **Optimized** file processing, significantly reducing document handling time.
- Ensured data **security** with robust encryption and access control.

Ed-Tech Online Education Services

- Developed the platform using **PHP (WordPress)** for content management and **Vue.js** for a dynamic, responsive user interface.
- Built a web-based learning platform for an India-based **ed-tech** company offering exam preparation courses (**IELTS, PTE, TOEFL**).
- Implemented **live video** classes, **chat** functionality, and student progress tracking.
- Designed an easy-to-use **dashboard** for **course management**, supporting both students and tutors.

LearnHub – Multi-Purpose Learning Management System (LMS)

- Contributed to an **LMS** platform used for managing courses, tests, live classes, attendance, and certification.
- **Built** and **optimized** backend **APIs** using **PHP**, improving overall **API** performance and response times.
- Developed **Node.js-based** services to support platform functionality alongside the **PHP** backend.
- Improved and expanded quiz functionality and video lecture management features.
- Improved the **multi-role** user system to support a large user base.
- Integrated **RabbitMQ** as a message broker to support reliable, asynchronous service communication.
- **Encrypted API** payloads to improve security.
- Built a new certificate management system, including certificate generation and progress tracking.

KEY ACHIEVEMENTS

- Improved website **loading speed**, resulting in a better user experience.
- Developed an **E-commerce** platform capable of handling a high volume of daily transactions.
- Optimized **database queries** to reduce response times and improve reliability.
- Built a **SaaS product** that streamlined document processing and reduced turnaround time for clients.
- Improved application response **speed** by implementing **Redis** for **caching**.

TECHNICAL SKILLS

Backend: PHP (Core, Laravel, CodeIgniter 3, WordPress), Node.js

Frontend: JavaScript, HTML, Bootstrap, Vue.js, Angular.js, jQuery

Database: MySQL, SQLite, Elasticsearch, MongoDB

DevOps & Cloud: Docker, AWS, GitHub Actions

Version Control: Git, GitHub, GitLab

AI & Messaging: Google Vertex AI, RabbitMQ

Caching: Redis

HTTP Requests: Axios, Ajax, Fetch, XHR

Testing & Debugging: Xdebug, Postman, PHPUnit.

SOFT SKILLS & LANGUAGES

Soft Skills: Problem Solving, Teamwork, Time Management, Critical Thinking

Languages: English, Hindi, Punjabi
